I. Essential Topics

➤ Introduction to Course/Overview

- Genealogy in general and Jewish Genealogy (JG) in particular
- Place of genealogy in other cultures (ancient dynastic [e.g. Sumerian, Egyptian], Arabic, European, Chinese, African tribal)
- Place of genealogy in the Jewish *weltanschauung*
- Ancient Jewish traditions – biblical, rabbinic literature
- JG as an independent field of investigation and as a sub-branch of Jewish studies (and not merely a useful methodology or research tool)
- Contemporary scholarly JG – from Leopold Zunz to Malcolm Stern and beyond (Paul Jacobi)
- The emergence of academic JG (as against popular/hobbyist family history)
- Macro-JG (as against micro-JG, focussing on individuals/personal lineages)
- JG as “generational history”
- From a diachronic perspective (historical) to a synchronic one (focussing on a geographical cross-section)
- Inter-disciplinary nature of JG – e.g. associated with various social sciences (sociology, demography, migration studies, statistics, etc.)
- Opening to questions of wider interest, not only to Jewish genealogists but also to scholars in other areas of the humanities and social sciences
- Need to “contextualise” the narrative - essential for broader relevance
- Use of scientific method – primary sources, verification, critical evaluation
- Theoretical aspects – research questions, working hypotheses
- The purpose of the research – meaningful insights into Jewish history and society through an innovative, essentially human prism
- Goal: to put JG on a par with other analytical approaches to Jewish history and society
